

Variety's **My Bike**® Program, **My Stroller**® Program, & **My Voice**® Program:

Variety's My Bike® Program currently provides eligible children with disabilities with a Rifton adaptive bicycle (with Rifton accessories) that is individually customized, so they may have the freedom of a bike and the joy of riding alongside friends and family.

"He's been wishing for this bike for a lot of years. He has three younger brothers and they're really active, and he lives by a park. He would love to go to the park and ride his bike with his grandma and brothers."

Variety's My Stroller® Program currently provides a Kid Kart® Mighty Lite adaptive stroller to eligible kids with disabilities for mobility and/or safety in the community. Typically, a family must choose between having a wheelchair or adaptive stroller. So, as a wheelchair is more necessary, an adaptive stroller allows for easier "on-the-go" mobility and participation in daily activities and throughout the community. With an adaptive stroller, kids are no longer isolated, and it has an immediate impact on their lives. For others, a child might need an adaptive stroller to stay safe and secure while out in the community (rather than for just for mobility use).

"This stroller will impact our family by helping us not fear outings and adventures. We currently struggle with day to day tasks because Kailey becomes very overwhelmed when in a public setting or in a crowded area. Kailey does not have safety awareness. Having a stroller to be able to take her virtually anywhere we want/need to go and also keep her safe. It will help us live and not fear."

Variety's My Voice® Program provides a communication device (i.e. currently a restricted iPad with a prescribed communication app) to eligible children with a communication disorder to give them a voice at all times – and enabling kids to express their thoughts, feelings, wants, and needs.

"Mia began trialing a communication device in the Spring of 2018, and it has been a catalyst for her understanding of what communication is and showing our family what she is capable of. One day, Mia showed us on her device how to spell her first name and last name without any prompting. We were shocked as we had no idea she knew that. We laughed, we cried, and celebrated. A device has given us hope and we would love for Mia to always have this opportunity to talk and showcase her cognitive ability. She has many obstacles, but having a device makes life at home and school a little easier." *-Anita, mother of Mia (left)*
